

NKY KNOWS SCIENCE

**RESEARCH ANYTHING.
ACCESS TALENT.**

The Cincinnati region has a strong record of firsts in medical research and healthcare. Many recognizable and widely-used treatments and protocols, including the development of Benadryl and the FAST (F-face, A-arm, S-speech, T-time) method for identifying signs of a stroke, were developed at the University of Cincinnati College of Medicine.

Cincinnati Children's Hospital Medical Center (CCHMC), ranked No. 3 among the best pediatric hospitals in the nation by U.S. News & World Report in 2022, traces its roots back to 1884.

Today, in Northern Kentucky, companies in this sector are leading cancer research and therapeutics laboratories, optical manufacturers and the region is home to the headquarters of CTI Clinical Trial and Consulting Services, which was recently named the #1 CRO in the world for quality at the 2022 CRO Leadership Awards.
