

Tri-ED Policy for Northern Kentucky Existing Business Projects:

1. Tri-ED provides economic development services to existing Northern Kentucky businesses when they consider growth, expansion or relocation. Tri-ED will provide the company with information and services to make an informed business decision in these circumstances.
2. Tri-ED will encourage companies to contact the leadership of their local community when their business requirements could result in relocation. The company will solely decide whether they choose to engage with their local community regarding their business plans. Regardless of a company's decision regarding their local community, Tri-ED will work with the company to make their best business decision with the goal of retaining them in Northern Kentucky.
3. Tri-ED will not inform a local community of our engagement with a company unless specifically authorized to do so and released from non-disclosure agreements by the company or until the company makes a public announcement.
4. Tri-ED will never proactively engage an existing Northern Kentucky business to relocate to another community.
5. Tri-ED will encourage local communities to not proactively engage existing Northern Kentucky businesses to relocate to their community.
6. Tri-ED will encourage local communities to proactively share with a potentially affected community any business relocation conversations in which they engage.
